

SHAC Meeting Minutes

February 23, 2016

The council discussed what assessment tool to use to evaluate the implementation of the wellness policy. They looked at questions from the Well SAT i. There are pieces for the principal, PE teacher, Food Service Director, and teachers that teach nutrition. The council agreed to use this tool for the annual evaluation. Nurse Franks will forward the questions to the principals and food service director and ask the principals to forward the appropriate pieces to PE and nutrition teachers. She will make them aware that they will need to complete the questions annually. This will be completed in February of 2017.

Update was given on the EKG clinic. Consents have been sent out for the March 9th clinic. We are asking students to return them March 2nd. Student athletes and band members will have this done at no cost to them. Teachers can have one done for \$15.

Nurse Franks asked the council's opinion on having a shot clinic for seniors and offering Meningitis vaccine. High School student council member said they had to have their vaccine in order to apply for college but they felt there may be students that still need it. Nurse Franks will check with neighboring school that are having shot clinic March 9th and see how their clinic goes.

Junior High already taught Choosing the Best. Junior High representatives are not here this month to get update from them.
